# Remote Freelance Data Scientist / ML / Data Engineer

Happy to discuss **remote contracts** via my company [Stratega!](#)

## PROFILE & SCOPE

---

**PROFILE:** Honesty, integrity, curiosity & perpetually learning. Motivated with 11+ years' experience within analytics, data science, databases, data lakes, ci/cd, scheduling, automation, development, machine learning, data science strategy & leadership.

**SEARCHING:** Remote Data Sci / Data Eng / ML Eng contract (Europe/North America)

**Project:** (web page implemented using both Neural Net & LLM model): *Covid-19 Wastewater Monitoring* <https://danieldynesius.github.io/covid/> (Python, Tensorflow etc)

**Languages:** Native/Fluent: Swedish, English | Conversational: Spanish  
| Intermediate: Norwegian | Basic: Danish, German, French

## EXPERIENCE

---

[Stockholm Exergi](#)

May 2021 – July 2023

**Data Scientist & Data Engineer**

*Contract Task:*

- Create a dynamic calculation of consumption based on business & statistical heuristics
- Maintain & quality control AWS & Azure data pipelines
- Create Docker containers for scripts
- Schedule Docker containers with Airflow
- Migrate tech, visualizations & models from AWS -> Azure
- Transformed big database to comply with new business logic for migration
- Assist with tech stack selection & evaluation
- Assist with ML-model development
- Contribute to data science strategy & vision

**Technologies:** Python, Spark, SQL, PostgreSQL, R, git, Gitlab, AWS, S3, RDS, EC2, Glue, Lambda, Snowflake, Airflow, Docker, Linux, DBT, Azure Synapse, Azure VM, Azure Machine Learning, PBI.

**Data Scientist**

*Responsibility:* Drive data science, innovation and automation within B2B.

- Batch data pipelines (SAS, SQL, Python, Pyspark) & system integration
- Built and deployed classification models to production (upsell, cross-sell, churn)
- Classical, machine learning & deep learning (Sklearn, Keras, Tensorflow)
- Developed Python gui tool for crm self-service across multiple channels
- Developed multiclassifier model
- Developed a/b testing framework
- Developed QlikSense gui apps

**Technologies:** Python, Teradata SQL, SQL Server, Spark, Sklearn, Keras, PySpark, SAS, QlikSense, Cloudera, Hive, Impala, Hadoop, Hue, Git, Bitbucket, Linux, REST API, Airflow, Jenkins.

**Data Scientist**

*Responsibility:* Drive Regional Data Science, Innovation and Pipeline Design.

- Regional customer journey insights
- Designing & building individual customer journey data model
- Designing & building digital marketing pipelining, analysis & performance automation
- Initial fraud detection design & spotting
- Exploratory Data Analysis

**Technologies:** PostgreSQL, R, AWS Redshift, AWS S3, Python, CLI

**Operations Manager**

Key Achievements: 1. Business expansion 2. GDPR Implementation

*Strategy:*

- Developing strategies for streamlined hiring processes on Swedish market
- Innovating operative transformation initiatives with global verticals
- Creating department performance KPI's to appraise and interpret outcomes

*Operations Management:*

- Process flow implementations through aligning stakeholders for automation
- System design and requirements for streamlined and compliant workflows
- GDPR stakeholder coordination, testing, evaluation and implementation
- Coordinating work from provider, ops, tech, dev, data science teams and client

---

### *Leadership:*

- Leading three operative teams through our major expansion (technical & service)
  - Developing staff by creating personal growth opportunities aligned with company goals
  - Fostering teamwork, responsibility and ownership
- 

### **The Nielsen Company – Stockholm, Sweden**

June 2014 – June 2017

#### **Data Analyst & Project Leader**

Key Achievements: 1. Analytics & automation 2. Team service delivery 3. Tender negotiation

#### *Analytics*

- Forecasting & predictive modelling: created KPI predictions
- Data refinement from low level technical data to weighted statistical data
- Reports to regional managers, internal statistics department and client

**Methods:** Regression, logistic regression, ANOVA, time-series analysis, A/B-testing

#### *Programming*

- Developed – visibility of trends, audience calculations, processing & database imports
- Maintaining and developed 60+ scripts and created tools for analysis and data production
- Developed script identifying configuration issues increasing data quality to client
- Automation of a multitude of reports, time save achieved 40-80 hours per week

**Technologies:** VBA, SPSS, Linux, SQL, Qlikview, HTML

#### *Presentations*

- Analytics & project representative at client meetings
- Holding analytics, operations, introduction, training and event presentations

#### *Project Leadership*

- Leading DA project team of twelve delivering reaching on target on time
  - Leading recurrent DA project team hiring, management, execution and delivery
  - Leading development and testing of data acquisition (DA) platform
  - Responsible for RFP, supplier evaluation, service pricing & tender management processes
- 

### **Dynamic Work Solutions – Sweden & France**

February 2013 – March 2013

#### **Project Consultant**

- Created simple process for merging data from Google Analytics to Microsoft Excel.
  - Assisting with data analytics insights
  - Gained experience in measurement methods of HR related constructs
-

## EDUCATION (University 8+ years)

2014 – Now	Programming Courses & Programming (Current)
2013 – 2014	Stockholm University, Theoretical Philosophy
2010 – 2014	Stockholm University, M.Sc. (Paused)
2006 – 2009	University of Alberta, B.A. Psychology & Philosophy
2003 – 2005	Stockholm University, Sociology

## VOLUNTEERING EXPERIENCE

**Nielsen Employee Experience** – Stockholm  
**Project Associate**

May 2015 – June 2017

**Nielsen Cares** (Charity) – Stockholm  
**Project Leader**

Oct 2014 – June 2015

## SKILLS

- Quantitative Analyses – Ability to tailor experimental design to specific questions
- Leadership – Experience in leading medium sized cross-functional teams
- Critical Thinking – Ability to analyze and assessing quantitative and theoretical problems
- Creative Problem Solver – Ability to develop, implement ideas, create solutions
- Versatile – Able to adapt, learn and perform well in times of change and challenge
- Determined – resilience and energy to solve difficult tasks

## LEISURE PURSUITS

- Game Development – Creating a visual novel game involving a struggling private detective. 2023 – Now
- Programming – Writing programs and code for analysis, games etc 2014 – Now
- Hobby Philosopher – Writing on multiple topics 2002 – Now
- Swedish Army Cadet (Frivillig befälsutbildning) 2001 – 2002
- Punk Rock Band - Playing and writing music 2000 – Now
